DETAILED ACTION

Applicant's Petition for Revival of this Application dated October 03, 2005 has been granted. Accordingly, the holding of abandonment dated April 26, 2005 has been withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 6-9 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Luetzow (0030122641). Luetzow discloses the same invention as claimed: A magnetic linear displacement sensor comprising: a Hall element 126 having a sensor plate surface S; and at least one magnet (112, 114) having a lengthwise dimension along which said Hall element detects a magnetic field component orthogonal to the sensor plate surface during displacement sensing, said magnet comprising first and second pole faces disposed on opposite lengthwise sides thereof and having a polarization axis D1 aligned orthogonally with respect to the lengthwise dimension, said first pole face opposing said Hall element and having a non-planar surface (paragraph 0052) contoured to generate a substantially linear orthogonal magnetic field component

sensed by said Hall element during linear displacement sensing. Also see PCT/ISA/220 (NPL dated 10-03-2005).

Allowable Subject Matter

Claims 10-11, 13 and 18-19 are allowed.

Claims 4-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on Oct. 03, 2005 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609.04(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
